SATHISHKUMAR K

Dynamic Frontend Developer with expertise in Angular, experienced in building scalable web applications. Collaborative team player with strong communication skills and a commitment to continuous learning.

Work Experience

Tata Consultancy Services

May 2022 - Present
- Worked on the development of a feature-rich Airline booking platform, enhancing user experience and increasing conversion rates by 20%.
- Implemented a Reimbursement, Cancel-refund and IROP form using Angular and NgRx, providing actionable insights and improving decision-making processes.
- Collaborated on a cross-functional team to integrate multiple micro frontends into a cohesive enterprise application, streamlining workflow efficiency.

Expertise

Design: Used figma to implement the UI design and styling
Development: Used Angular Framework for front-end development, features such as components, services, directives and modules. For data handling NgRx state management and RxJs reactive programming. Routing (Chiled routing & Lazy loading), Forms (Reactive & Template driven Forms) and more.
Testing: Used JEST unit testing to test functionalities.
CI/CD: Used github actions to add continuous integration and continuous deployment.
Hosting: Used Firebase cloud computing services to host static websites.

Aditionally, keeping up with latest updates in Angular.

Educational Background

Bachelor of Engineering, CSE

Thiruvalluvar College of Engineering and Technology
2017 - 2021 (76.5% CGPA)
- Specialization in Computer Science.
